

360imaging® and Nobel Biocare™

A new way of practicing dentistry

What 360digital lab™ means to you:

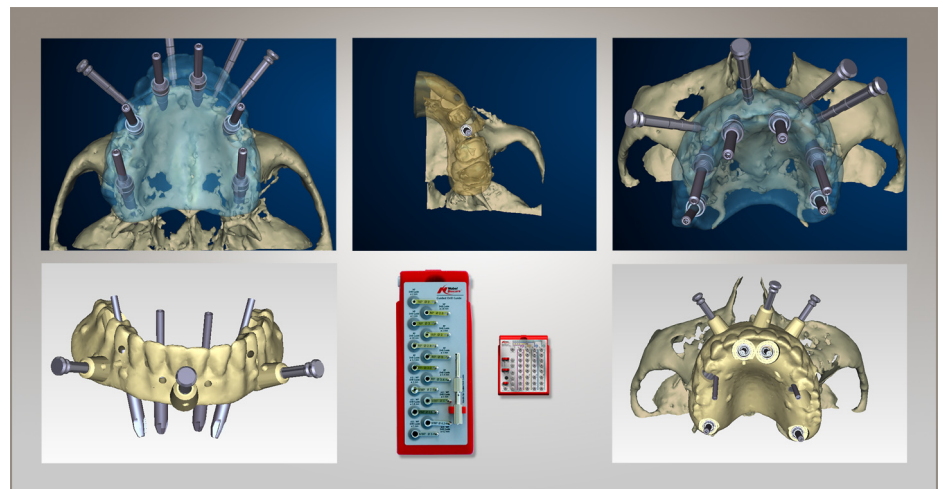

With so many cutting edge 3D dental technologies available for implant dentistry how are you going to maximize your investment in Nobel Biocare™ minimize your overhead and insure you are providing your patients with the best possible treatment plan? By utilizing 360imaging's 360digital lab™ services, you can easily become a turn-key 3D CT practice, without all the added expenses and headaches.

The first step is to have a CT scan taken of your patient. Then, utilizing our 360client™, you securely transfer your CT scan to the 360digital lab™. Once our 360digital lab™ receives your image, we will guide you in taking advantage of some exciting technologies.

- In-house OMF Radiologist – Provides you with comprehensive narrative reports and consults.
- Industry Leading 3D Image Modeling – Our image modeling specialists are well-versed in all of the latest 3D dental software.

- Custom Treatment Plans and Surgical Guides – We develop a preliminary plan for your review. We work with you and your team to revise the plan to meet your needs. After receiving your approval, we order the guide... **as simple as 1-2-3.**

Once the radiologist report, modeling and treatment plans are completed by our 360digital lab™ technicians, you can immediately view them and provide your patients with a comprehensive and effective treatment plan.

**Make 360imaging® and Nobel Biocare™
part of your implant team.**

For a limited time, save \$1,000 on 360digital lab™ services. Call us today at **866.360.6622** to receive more information or email us at **lab@360imaging.com**.
